It is Chinese tradition to give children red pocket money during Spring Festival. The red pocket money means the good wishes to the children. But as the time went by, the amount of money needs to be added, and some people even judge a person by the money that he gives to the children. It has become a burden for the young people, because if they don't give a lot of red pocket money to the children, others will look down upon them. For the young people, they are under great pressure. They need to pay for the house and meet the basic needs. Sometimes the pocket money may cost more than a month's salary. What a great burden. The meaning of red pocket money is to bring luck to children, instead of asking for money.

高三英语作文优秀范文欣赏 篇4

We are always educated that human and animals are friends, and we should get along well with each other harmoniously. Nowadays, most young people like to keep pets, and they treat these lovely animals as their families. The relationship between men and animals are strong. Take the movie Hachi for example. Most people have seen this touching movie would be impressed by the dog's loyalty to his master. They just can't help tearing. This director is good at describing the animals. His new work will be soon brought to the screen and surely people will be touched again. In some places, people have the tradition to eat cats and dogs. It is so cruel. Protecting animals is everybody's duty. If someday they disappear, then the biological system will be broken and there is a great crisis for human being to survive.

Music is part of our life today. No one will say no to music and everybody has their taste about music. When I was very small, my parents would let me listen to the classic music. They want to develop my interest and have a good taste. But as I grow up, I fall in love with rock music, which makes me feel cool. It is said that music can heal people's soul.

I agree with it. When I am not happy, I will listen to music and then dance in my bedroom. The moment I'm immersed myself in the music, I will forget about my sorrow and annoyance soon. What's more, listening to songs is a good way to learn the second language. For many Chinese students, they learn the words by listening to English songs that they like. It is an efficient way. Music is full of charm.

Cactuses are used to living in desert. The whole body of a cactus is green. The stalk is oval and there are thorns all over its body. Actually the thorns in their bodies are their leaves. When I was small, I lived in my hometown, it is a small village, but the scenery is so beautiful,

the trees are so green and the water is so clean. But when I went to primary school, I moved to the city with my parents, I missed the time in my hometown so much. When I was in my hometown, I woke up early in the morning, some people took a walk and some were doing their farm work. I would always go to the mountain with my grandma, we took care of the fruit trees. The little dog would come with me, when my grandma was doing her work, I played with the dog, how happy I was. Sometimes I would go to the river with my friends to catch the fish, I saw the fish clearly. These are beautiful memory for me, I keep it all the time.

Should We Believe in Specialists?

Specialists' suggestions seem to be everywhere nowadays. They frequently appear in advertisements, TV shows, and the news discussion and so on. However, some people hold the opinion that the specialists' suggestions are not as authoritative as before. We should not trust them anymore. However, in my opinion, I think we can believe in specialists as long as they are honest, and the products they recommend to us are proved to be good.

First of all, there are more than a few fake specialists in China. These fake specialists pretend to be professional in the public. Some of the immoral advertisers use money to hire the fake specialists to be their products spokesmen. Then the consumer will fall for the beautiful lies the so called specialists tell them. The truth is that the real specialists are forbidden to take up these kinds of ads; they should stay in their labs and do experiments. Second, the real specialists are quite intelligent and they are able to solve many problems. They can teach us lots of knowledge that we ever learn from the textbooks. For instance, they may teach us how to stay in good health through eating particular food, or the effective way to reduce stress. The most important thing is the words they say are proved to be true. In this case, we can believe in the specialists.

I think the rational people can tell the different between fake and real specialists. If you see the specialist on the TV to sell medicine in an extremely high price, don't trust them. If they offer you practical advices, then you will know they are real.

Although our generation has received much criticism, I am still proud of being one of the 90 generations. Many people consider us as open, bold, outstanding character, early-maturing, and selfish and so on. Actually, I don't think those descriptions are bad. What we perform is the need of society. We are open and bold means we ready to connect with the world. I think our outstanding character is necessary. Don't you think it is terrible that everyone in the world is the same? As for early-maturing, I think it is good for us to do well preparation for entering the society. Last, I don't think people can criticize us to be selfish. People often say that everyone is selfish. 90 generation is a promising new generation.

Every year a lot of people are killed or injured in road accidents. How can we make the roads safer? Remember the following traffic rules.

When you ride a bike, keep to the right side of the road. Don't cross the road or turn left at a red traffic light. Give a hand signal if you want to turn or stop.

Before crossing the road, stop and look both ways, right and left. If the road is clear, it is safe to cross. The correct way to cross is to walk quickly, but not to run. If you run across the road, you may fall down.

If you see small children or old people waiting to cross the road, it is a kind deed to help them to cross in safety. We should teach small children not to play or ride on the roads.

Always obey these rules, you'll find it much safer to walk or ride on the road.

To be successful, students learn many knowledge so as to master as more skills as possible. Some believe that the key to realize our dreams is to work hard and others treat chance in the first place. While today is the information world, the one who masters the all-sided source will have more chances to be successful. In my opinion, the most important skill is the social skill, because we need to make connection with others, we are not doing business with ourselves, so it is in need of having relationship with others. The good social skill can help us attract attention easily and impress the future partner. If we are bad in communicating, how can we let others know our advantages and trust us. So promoting ourselves is the first job, from now on, don't be shy.

Spring festival is a Chinese traditional holiday, but many people do not know the real meaning of this celebration. More and more people prefer to celebrate spring festival by watching the spring festival gala and ma-ki-ng lots of fireworks rather than get along with their relatives. I think the true meaning of this festival is that families get together to talk about each other. So, I suggest people spend more time with their family rather than pay too much attention to the TV or fireworks, because that is the spirit of the spring festival.

The other day at a class meeting we had an argument over whether it was necessary to carry out outer space exploration.

Some of us held it important to research outer space because, first of all, people can get a better understanding of outer space through their exploration. Second, new resources can be found there for human use. Third, this exploration can possibly bring about new living space for human life.

However, others thought very differently. They said this kind of exploration is much too costly. Besides, it is very dangerous for astronauts to do such work.

In my opinion, people should be pioneering(先驱的 ; 开创的)and therefore such exploration of outer space is worth trying out.

once I read the story that the little eagles needed to practice flying in the cliff before they could fly.

The successful ones could fly and became the strong birds while the failed ones would crash and then died. The mother eagles are brutal to the babies, but this is the price of growing up. The little eagles who fail to fly would not live long in the natural competition. It makes me think of the children, some parents spoil the kids and they don't realize it will destroy their children. The children need to learn the lessons, so that they can be the tough person. The road of being mature needs the price.

On June 5th, I will go to school by bike or on foot instead of taking the bus. And I will also ask my parents to ride bikes to work that day. At the same time, I will tell my parents to take bags when they go shopping. And I will turn off the lights before leaving the room.

Lower carbon, happier life. Let's take actions.

高三英语作文优秀范文欣赏 篇30

More and more middle school students are going to all kinds of training classes or having family teachers at the weekend. There are two different viewpoints about it.

On the one hand, some think that studying following the family teachers is better than self study. It can not only strengthen what you've learnt at school, but help you learn more useful things as well.

On the other hand, some people who have the different opinion consider it a waste of time and money, for many training classes and family teachers are just working for money, you can not learn something really useful there, and thus lose the time of relaxing yourselves.

In my opinion, as students, we should really know whether we need a training class or family teacher. First, make sure that you need them, and they would be helpful, then choose a reasonable one. Just remember, once you start and never give up.

More and more middle school students are going to all kinds of training classes or having family teachers at the weekend. There are two different viewpoints about it.

Some people think that going to training class or having family teachers can not only strengthen

the knowledge the students have learned but also help them to study better .What's more ,students can gain some knowledge that hasn't been told in class.

However ,some others have an opposite opinion in their opinion ,this kind of study can make students passive in their studies and always depend on others .What's worse ,some Training Class and Family teachers care not students but money .So it's a waste of money .Students need have a rest after school .The Training Class will take up most of their spare time .

In my opinion ,both viewpoints are reasonable .The choice should depend on which one is fit for the students himself .If he's good at self-studying ,he may stay at home and study by himself if he does well in listening to what teachers say ,studying in Training Class would also be a good choice .

Wide sea diving, sky high the birds to fly. The beauty of poetry is contained. Wenhao Hugo has said: The broader in the world is the ocean, which is wide than the ocean. It is a wide range of people than the sky. Yes, people 's mind can be inclusive, just like a public saying: the army can run the horse, and the prime minister can support the boat. Inclusive, it is virtual valentine, seeking to deposit; to treat people, strictly learn from it; The world needs to be included, people should learn to be inclusive. The inclusive is a happy source. Learn to accumulate, don't be happy, don't worry, life is full of sunshine. Don't blame the sky, maybe this is just a cultivation in the wild, and people who explore the hard work will be cool; don't blame the bus, and maybe the driver is using this minute to support an old man to get on the bus; don't complain the shortcomings of people, Perhaps he is also tolerate torture like you; don't blame your fate, maybe it is sharpening your will. Less complaints, more tolerance, can spread the happy seeds in the world. The inclusive is the cornerstone of friendship. Really friendship, starting from sincerity, with inclusive maintenance. Lian Po, Yan Xiangru "will be related to", "is condensed with friendship, and jointly owns the country. When Lincoln acts on the political stage, he often has a group of people and his opposition; he has not retailed this forces after entering the main white hustle, but inclusive as a friend. The inclusion is an important condition for the achievement of the business. The son is a small white, and he is a branch, and it will become a spring and autumn. Zhuge Liang has won the convincing of Meng and ethnic minorities with broad mind. Ancient and modern business workers must have big breasts, learn to accumulate, and can take victories to come. But the inclusion is not a capacity, not all tolerance. "Three people, there must be my teacher" and the following sentence: "Choose a good person from it, and its bad people will change." It can't be accommodated against false disgusting, because it is an inclusion of despicable sin. Perhaps, there will be more than an inclusive, there will be no smoke in Iraq, and there is a shammond of the situation. We have a great motherland, to build a harmonious society, to fight for peace and unity, but also tolerate. Learn to include, let the soul sweep the shadow, remove the burden, galloping in a broader world!

I don't know that the high school has been one month, it seems to be integrated into high school life, but there is still a sparse and discomfort. The school is not smooth, many lonely and desolate after separation of friends, now always spend the sound of sigh. The first time I entered Youri was the day to the school, a completely strange environment made me have to follow my neighbors is also my current classmate in the teaching building around. Xin Xin's hard squeezing into the crowd, smashing the name on the list, seeing that he is in the class, look at it, looking at there is any class of classmates, I am glad to have a classmate I like. Otherwise it

will really help. I don't know how to find my class, I just found a position to sit down, there is no known person next to it. At that time, I just stayed at the class teacher, but I didn't have a picture on him. I only remember that there was no thing that day. It's fascinating. The next day, the seat was ranked, just sitting with the previous classmates, I was excited for this, and I finally felt that I rely, I didn't know when it became so weak. Maybe there is a shadow to rely on it, I still remember that I didn't like her when I saw her, or I was in the first three, I was beginning to be close, and then I just didn't leave her, maybe this It is the fate, I always feel that I have to find a friend. I have no speeches, why is it always coming so late, always wanting to be late when it is alone? Now, students always talk very speculative, and I seem to have been isolated, so helpless, I can only wait for the arrival of fate, and when?
